THE AERONAUTICAL JOURNAL

OF THE ROYAL AERONAUTICAL SOCIETY

Volume CXVII

January-December 2013

Subject Index

AERODYNAMICS

A computational investigation of laminar shock/wave boundary layer interactions. N.R. Deepak, S.L. Gai and A.J. Neely, pp 27-56.

Aerodynamic design and experimental modelling of an innovative supersonic three-dimensional air-intake. Y.P. Gounko, I.I. Mazhul and A.M. Kharitonov, pp 559-584.

Aerodynamic performance benefits of utilising camber morphing wings for unmanned air vehicles. A. García Naranjo, I. Cowling, J.A. Green and N. Qin, pp 315-327.

Aerodynamic studies over a manoeuvring UCAV 1303 configuration. M.S. Chandrasekhara and B.K. McLain, pp 445-465.

Aerodynamics and aerodynamic research in Formula 1. W. Toet, pp 1-26.

Aerothermodynamics of a hypersonic projectile with a double-disk aerospike. R. Yadav and U. Guven, pp 913-928.

Assessment of surface roughness for a 'silent' aircraft. Y. Liu, pp 283-298.

Comparison of flight test data with a computational fluid dynamics model of a Scottish Aviation bulldog aircraft. N.J. Lawson, pp 1273-1291.

Experimental investigation of the role of struts in high speed mixing. S.L.N. Desikan, J. Kurian, pp 193-211.

Flow features around double cones at hypersonic speed. R. Gomes-Fernandes, pp 741-748.

Formation of vortices and spanwise flow on an insect-like flapping wing throughout a flapping half cycle. N. Phillips and K. Knowles, pp 471-490.

High resolution computation of compressible condensing/evaporating moist-air flow for external and internal flows. S. Hamidi and M.J. Kermani, pp 427-444.

Hypersonic minimum drag forebodies with blunt leading edges. J. Pike, pp 553-557.

In-flight simulation of wake encounters using deformed vortices. V. Vechtel, pp 997-1018.

Numerical simulation of ramp induced shock wave/boundary-layer interaction in turbulent fl ow. H.A. Asmelash, R.R. Martis and A. Singh, pp 629-638.

On the effectiveness of active aeroelastic structures for morphing aircraft. R.M. Ajaj, M.I. Friswell and E.I. Saavedra Flores, pp 1167-1176.

Optimal aircraft take-off with thrust vectoring. A.K. Vinayagam and N.K. Sinha, pp 1119-1138.

Optimisation of round bodies for aerodynamic performance and stability at supersonic speeds. W. Jiajan, R.S.M Chue, T. Nguyen and S. Yu, pp 661-685.

Pressure measurements over a hemisphere-cylinder body attached with a forward facing spike. R. Kalimuthu, R.C. Mehta and E. Rathakrishnan, pp 639-646.

Rapid, parallel CFD grid generation using octrees. G.J. Page, pp 133-146.

Roll control of a MALE UAV using the adaptive torsion wing. R.M. Ajaj, M.I. Friswell, W.G. Dettmer, A.T. Isikveren and G. Allegri, pp 299-314.

Spin induced aerodynamic flow conditions on full-scale aeroplane wing and horizontal tail surfaces. R. I. Hoff and G. B. Gratton, pp 1207-1231.

Stalling transport aircraft. P.J. Bolds-Moorehead, V.G. Chaney, T. Lutz and S. Vaux, pp 1183-1206.

Supersonic flow over three dimensional cavities. R. Das, J. Kurian, pp 175-192.

The influence of simulated missile warhead fragment damage on the aerodynamic characteristics of two-dimensional wings. A.J. Irwin and P.M. Render,

pp 823-837.
The influence of transition onset location on the performance of shock control bumps. S.C. McIntosh and N. Qin, pp 1037-1051.
The virtual AirDyn: A simulation technique for evaluating the aerodynamic impact of ship superstructures on helicopter operations. C.H. Kääriä, J.S. Forrest and I. Owen, pp 1233-1248.

AEROELASTICITY

Aerodynamic performance benefits of utilising camber morphing wings for unmanned air vehicles. A. García Naranjo, I. Cowling, J.A. Green and N. Qin, pp 315-327.
Effect of a special reinforcement on the elastic properties of micro- and nanocomposites with polymer matrix. I.A. Guz, J.J. Rushchitsky and A.N Guz, pp 1019-1036.
Formation of vortices and spanwise flow on an insect-like flapping wing throughout a flapping half cycle. N. Phillips and K. Knowles, pp 471-490.
On the effectiveness of active aeroelastic structures for morphing aircraft. R.M. Ajaj, M.I. Friswell and E.I. Saavedra Flores, pp 1167-1176.
Roll control of a MALE UAV using the adaptive torsion wing. R.M. Ajaj, M.I. Friswell, W.G. Dettmer, A.T. Isikveren and G. Allegri, pp 299-314.

AEROSPACE ENGINEERING

A virtual test environment for validating spacecraft optical navigation. S.M. Parkes, I. Martin, M.N. Dunstan, N. I. Rowel, O. Dubois-Matra and T. Voirin, pp 1075-1101.
Constrained large angle reorientation manoeuvres of a space telescope using potential functions and a variable control gain. G. Mengali and A.A. Quarta, pp 807-821.
Effect of a special reinforcement on the elastic properties of micro- and nanocomposites with polymer matrix. I.A. Guz, J.J. Rushchitsky and A.N Guz, pp 1019-1036.
One-dimensional model of a pulsed plasma thruster. T.R. Nada, pp 929-942.

AIRCRAFT DESIGN

A conceptual wing-box weight estimation model for transport aircraft. R.M. Ajaj, M.I. Friswell, D. Smith and A.T. Isikveren, pp 533-551.
Aerodynamic studies over a manoeuvring UCAV 1303 configuration. M.S. Chandrasekhara and B.K. McLain, pp 445-465.
Application of the weight function method on a high incidence research aircraft model. N. Anton, R.M Botez and D. Popescu, pp 897-912.
Buoyancy estimation of a Montgolfière in the atmosphere of Titan. G.E. Dorrington, pp 943-957.
Enabling technologies for a centre-line tiltrotor. B. Burrage and E. Çınar, pp 389-414.
Influence of weight modelling on the outcome of wing design using multidisciplinary design optimisation techniques. J. Mariens, A. Elham and M.J.L. van Tooren, pp 871-895.
On the effectiveness of active aeroelastic structures for morphing aircraft. R.M. Ajaj, M.I. Friswell and E.I. Saavedra Flores, pp 1167-1176.
Panel method predictions of added mass for flexible airship. M. Zhang, X. Wang and D. Duan, pp 519-531.
The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures. S. Niemann, B. Kolesnikov, H. Lohse-Busch, C. Hühne, O.M. Querin, V.V. Toropov and D. Liu, pp 1139-1154.
Wing mass estimation algorithm for medium range box wing aircraft. P.O. Jemitola, G. Monterzino and J. Fielding, pp 329-340.

AIRWORTHINESS

Comparison of flight test data with a computational fluid dynamics model of a Scottish Aviation bulldog aircraft. N.J. Lawson, pp 1273-1291.
Roll control of a MALE UAV using the adaptive torsion wing. R.M. Ajaj, M.I. Friswell, W.G. Dettmer, A.T. Isikveren and G. Allegri, pp 299-314.
Spin induced aerodynamic flow conditions on full-scale aeroplane wing and horizontal tail surfaces. R.I. Hoff and G.B. Gratton, pp 1207-1231.
Stalling transport aircraft. P.J. Bolds-Moorehead, V.G. Chaney, T. Lutz and S. Vaux, pp 1183-1206.
The influence of simulated missile warhead fragment damage on the aerodynamic characteristics of two-dimensional wings. A.J. Irwin and P.M. Render, pp 823-837.

Welding and Joining of Aerospace Materials. M.C. Chaturvedi (Ed), p 89.

COMPOSITES

A study of mixed-mode composite delamination using enriched interface elements. I. Guiamatsia, J.K. Ankersen and L. Iannucci, pp 959-967.

Effect of a special reinforcement on the elastic properties of micro- and nanocomposites with polymer matrix. I.A. Guz, J.J. Rushchitsky and A.N Guz, pp 1019-1036.

Energy absorption of sandwiched honeycombs with facesheets under in-plane crushing. B. Atli-Veltin and B. Gandhi, pp 687-708.

Guided wave propagation in composite laminates using piezoelectric wafer active sensors. M. Gresil and V. Giurgiutiu, pp 971-995.

Progressive failure analysis for the interaction of inter-laminar and intralaminar failure modes in composite structures with an initial delamination. W. Ji and A.M. Waas, pp 71-85.

The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures. S. Niemann, B. Kolesnikov, H. Lohse-Busch, C. Hühne, O.M. Querin, V.V. Toropov and D. Liu, pp 1139-1154.

COMPUTATIONAL FLUID DYNAMICS

A computational investigation of laminar shock/wave boundary layer interactions. N.R. Deepak, S.L. Gai and A.J. Neely, pp 27-56.

A finite-volume gas-kinetic method for the solution of the Navier-Stokes equations. M. Righi, pp 605-616.

Assessment of surface roughness for a 'silent' aircraft. Y. Liu, pp 283-298.

Comparison of flight test data with a computational fluid dynamics model of a Scottish Aviation bulldog aircraft. N.J. Lawson, pp 1273-1291.

Flow features around double cones at hypersonic speed. R. Gomes-Fernandes, pp 741-748.

High resolution computation of compressible condensing/evaporating moist-air flow for external and internal flows. S. Hamidi and M.J. Kermani, pp 427-444.

In-flight simulation of wake encounters using deformed vortices. V. Vechtel, pp 997-1018.

Numerical simulation of ramp induced shock wave/boundary-layer interaction in turbulent fl ow. H.A. Asmelash, R.R. Martis and A. Singh, pp 629-638.

Pressure measurements over a hemisphere-cylinder body attached with a forward facing spike. R. Kalimuthu, R.C. Mehta and E. Rathakrishnan, pp 639-646.

Rapid, parallel CFD grid generation using octrees. G.J. Page, pp 133-146.

Spin induced aerodynamic flow conditions on full-scale aeroplane wing and horizontal tail surfaces. R.I. Hoff and G.B. Gratton, pp 1207-1231.

Supersonic flow over three dimensional cavities. R. Das, J. Kurian, pp 175-192.

The influence of simulated missile warhead fragment damage on the aerodynamic characteristics of two-dimensional wings. A.J. Irwin and P.M. Render, pp 823-837.

The influence of transition onset location on the performance of shock control bumps. S.C. McIntosh and N. Qin, pp 1037-1051.

COMPUTATIONAL TECHNIQUES

A computational investigation of laminar shock/wave boundary layer interactions. N.R. Deepak, S.L. Gai and A.J. Neely, pp 27-56.

Density measurements for rectangular free jets using background-oriented schlieren. T.J. Tipnis, M.V Finnis, K. Knowles and D. Bray, pp 771-785.

Fuel burn prediction algorithm for cruise, constant speed and level flight segments. B.D. Dancila, R. Botez and D. Labour, pp 491-504.

High resolution computation of compressible condensing/evaporating moist-air flow for external and internal flows. S. Hamidi and M.J. Kermani, pp 427-444.

Numerical simulation of ramp induced shock wave/boundary-layer interaction in turbulent flow. H.A. Asmelash, R.R. Martis and A. Singh, pp 629-638.

Rapid, parallel CFD grid generation using octrees. G.J. Page, pp 133-146.

Simulations of a low-boom, axisymmetric, external compression inlet. T.L. Coyne, B. Loth, J. Koncsek, D. Davis, T. Conners and D. Howe, pp 709-726.

Validation of mathematical models for helicopter flight simulators past, present and future challenges. M.D. Pavel, M. White, G.D. Padfield, G. Roth, M. Hamers and A. Taghizad, pp 343-388.

DAMAGE TOLERANCE

Energy absorption of sandwiched honeycombs with facesheets under in-plane crushing. B. Atli-Veltin and B. Gandhi, pp 687-708.

Probabilistic considerations for growth and detection of cracks from rivet holes in a lap joint. M.L. Cohen and J.D. Achenbach, pp 727-740.

Progressive failure analysis for the interaction of inter-laminar and intralaminar failure modes in composite structures with an initial delamination. W. Ji, A.M. Waas, pp 71-85.

The influence of simulated missile warhead fragment damage on the aerodynamic characteristics of two-dimensional wings. A.J. Irwin and P.M. Render, pp 823-837.

ENVIRONMENTAL ENGINEERING

A new method to reduce the noise of the miniaturised inertial sensors disposed in redundant linear

configurations. T.L. Grigorie, R.M. Botez, pp 111-132.
Creating a space debris catalogue for an orbital band with suitable candidates for active removal. D. Dean, pp 617-628.
Fuel burn prediction algorithm for cruise, constant speed and level flight segments. B.D. Dancila, R. Botez and D. Labour, pp 491-504.
Multidisciplinary optimisation framework for minimum rotorcraft fuel and air pollutants at mission level. C. Linares, C.P. Lawson and H.A. Smith, pp 749-767.
Preliminary design and performance analysis of a low emission aero-derived gas turbine combustor. B. Khandelwal, A. Karakurt, V. Sethi, R. Singh and Z. Quan, pp 1249-1272.
Simulations of a low-boom, axisymmetric, external compression inlet. T.L. Coyne, B. Loth, J. Koncsek, D. Davis, T. Conners and D. Howe, pp 709-726.

FATIGUE

Effect of change in role of an aircraft on engine life. A. Gad-Briggs, A. Haslam and P. Laskaridis, pp 1053-1070.
Probabilistic considerations for growth and detection of cracks from rivet holes in a lap joint. M.L. Cohen and J.D. Achenbach, pp 727-740.
Progressive failure analysis for the interaction of inter-laminar and intralaminar failure modes in composite structures with an initial delamination. W. Ji and A.M. Waas, pp 71-85.

FLIGHT CONTROL

Aerodynamic performance benefits of utilising camber morphing wings for unmanned air vehicles. A. García Naranjo, I. Cowling, J.A. Green and N. Qin, pp 315-327.
Comparison of flight test data with a computational fluid dynamics model of a Scottish Aviation Bulldog aircraft. N.J. Lawson, pp 1273-1291.
Effect of autopilot modes on flight performances of electric mini-UAVs. G. Guglieri, pp 57-69.
Optimal aircraft take-off with thrust vectoring. A.K. Vinayagam and N.K. Sinha, pp 1119-1138.
Robust and computational efficient autopilot design: A hybrid approach based on classic control and genetic-fuzzy sliding mode control. A.R. Babaei, M. Mortazavi and M.B. Menhaj, pp 839-859.
Roll control of a MALE UAV using the adaptive torsion wing. R.M. Ajaj, M.I. Friswell, W.G. Dettmer, A.T. Isikveren and G. Allegri, pp 299-314.
The influence of simulated missile warhead fragment damage on the aerodynamic characteristics of two-dimensional wings. A.J. Irwin and P.M. Render, pp 823-837.
The virtual AirDyn: A simulation technique for evaluating the aerodynamic impact of ship superstructures on helicopter operations. C.H. Kääriä, J.S. Forrest and I. Owen, pp 1233-1248.
Vision guidance of a fixed wing UAV using a single camera configuration. P.-T. Iong, S.-H. Chen and Y. Yang, pp 147-173.

FLIGHT CONTROL SYSTEMS

Aerodynamic performance benefits of utilising camber morphing wings for unmanned air vehicles. A. García Naranjo, I. Cowling, J.A. Green and N. Qin, pp 315-327.
Robust and computational efficient autopilot design: A hybrid approach based on classic control and genetic-fuzzy sliding mode control. A.R. Babaei, M. Mortazavi and M.B. Menhaj, pp 839-859.
Roll control of a MALE UAV using the adaptive torsion wing. R.M. Ajaj, M.I. Friswell, W.G. Dettmer, A.T. Isikveren and G. Allegri, pp 299-314.
Vision guidance of a fixed wing UAV using a single camera configuration. P.-T. Iong, S.-H. Chen and Y. Yang, pp 147-173.

FLIGHT DYNAMICS

Aerodynamic studies over a manoeuvring UCAV 1303 configuration. M.S. Chandrasekhara and B.K. McLain, pp 445-465.
Effect of autopilot modes on flight performances of electric mini-UAVs. G. Guglieri, pp 57-69.
Formation of vortices and spanwise flow on an insect-like flapping wing throughout a flapping half cycle. N. Phillips and K. Knowles, pp 471-490.
New altitude optimisation algorithm for the flight management system CMA-9000 improvement on the A310 and L-1011 aircraft. R.S. Félix Patrón., R.M. Botez and D. Labour, pp 787-805.
Roll control of a MALE UAV using the adaptive torsion wing. R.M. Ajaj, M.I. Friswell, W.G. Dettmer, A.T. Isikveren and G. Allegri, pp 299-314.
Stalling transport aircraft. P.J. Bolds-Moorehead, V.G. Chaney, T. Lutz and S. Vaux, pp 1183-1206.

HUMAN FACTORS

New altitude optimisation algorithm for the flight management system CMA-9000 improvement on the A310 and L-1011 aircraft. R.S. Félix Patrón., R.M. Botez and D. Labour, pp 787-805.
Stalling transport aircraft. P. J. Bolds-Moorehead, V. G. Chaney, T. Lutz and S. Vaux, pp 1183-1206.

HYPERSONIC FLIGHT

Flow features around double cones at hypersonic speed. R. Gomes-Fernandes, pp 741-748.

Hypersonic minimum drag forebodies with blunt leading edges. J. Pike, pp 553-557.

HYPERSONICS

Aerothermodynamics of a hypersonic projectile with a double-disk aerospike. R. Yadav and U. Guven, pp 913-928.

JETS

Density measurements for rectangular free jets using background-oriented schlieren. T.J. Tipnis, M.V Finnis, K. Knowles and D. Bray, pp 771-785.
Experimental studies on rectangular jets with trapezoidal tabs. A. Arokkiaswamy, S.B. Verma and S. Venkateswaran, pp 505-517.

LIGHTER-THAN-AIR

Buoyancy estimation of a Montgolfière in the atmosphere of Titan. G.E. Dorrington, pp 943-957.
Panel method predictions of added mass for flexible airship. M. Zhang, X. Wang and D. Duan, pp 519-531.

MATERIALS

A study of mixed-mode composite delamination using enriched interface elements. I. Guiamatsia, J.K. Ankersen and L. Iannucci, pp 959-967.
Effect of a special reinforcement on the elastic properties of micro- and nanocomposites with polymer matrix. I.A. Guz, J.J. Rushchitsky and A.N Guz, pp 1019-1036.
Energy absorption of sandwiched honeycombs with facesheets under in-plane crushing. B. Atli-Veltin and B. Gandhi, pp 687-708.
On the effectiveness of active aeroelastic structures for morphing aircraft. R.M. Ajaj, M.I. Friswell and E.I. Saavedra Flores, pp 1167-1176.
The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures. S. Niemann, B. Kolesnikov, H. Lohse-Busch, C. Hühne, O.M. Querin, V.V. Toropov and D. Liu, pp 1139-1154.

PROPULSION

Aerodynamic design and experimental modelling of an innovative supersonic three-dimensional air-intake. Y.P. Gounko, I.I. Mazhul and A.M. Kharitonov, pp 559-584.
Density measurements for rectangular free jets using background-oriented schlieren. T.J. Tipnis, M.V Finnis, K. Knowles and D. Bray, pp 771-785.
Effect of change in role of an aircraft on engine life. A. Gad-Briggs, A. Haslam and P. Laskaridis, pp 1053-1070.
Fuel burn prediction algorithm for cruise, constant speed and level flight segments. B.D. Dancila, R. Botez and D. Labour, pp 491-504.
Multidisciplinary optimisation framework for minimum rotorcraft fuel and air pollutants at mission level. C. Linares, C.P. Lawson and H.A. Smith, pp 749-767.
One-dimensional model of a pulsed plasma thruster. T.R. Nada, pp 929-942.
Optimal aircraft take-off with thrust vectoring. A.K. Vinayagam and N.K. Sinha, pp 1119-1138.
Preliminary design and performance analysis of a low emission aero-derived gas turbine combustor. B. Khandelwal, A. Karakurt, V. Sethi, R. Singh and Z. Quan, pp 1249-1272.
Recent achievements in numerical simulation for aircraft power-plant configurations. J. Reneaux, V. Brunet, S. Esquieu, M. Meunier and S. Mouton, pp 213-231.
Simulations of a low-boom, axisymmetric, external compression inlet. T.L. Coyne, B. Loth, J. Koncsek, D. Davis, T. Conners and D. Howe, pp 709-726.

ROTORCRAFT

Enabling technologies for a centre-line tiltrotor. B. Burrage and E. Çınar, pp 389-414.
Multidisciplinary optimisation framework for minimum rotorcraft fuel and air pollutants at mission level. C. Linares, C.P. Lawson and H.A. Smith, pp 749-767.
Rotorcraft simulation fidelity: new methods for quantification and assessment. P. Perfect, A.W. Gubbels, pp 235-282.
The virtual AirDyn: A simulation technique for evaluating the aerodynamic impact of ship superstructures on helicopter operations. C. H. Kääriä, J.S. Forrest and I. Owen, pp 1233-1248.
Validation of mathematical models for helicopter flight simulators past, present and future challenges. M.D. Pavel, M. White, G.D. Padfield, G. Roth, M. Hamers and A. Taghizad, pp 343-388.

SAFETY

Comparison of flight test data with a computational fluid dynamics model of a Scottish Aviation bulldog aircraft. N.J. Lawson, pp 1273-1291.
New altitude optimisation algorithm for the flight management system CMA-9000 improvement on the A310 and L-1011 aircraft. R.S. Félix Patrón., R.M. Botez and D. Labour, pp 787-805.
New directions for air traffic control simulators: A discussion to guide the selection and renovation

of simulators. C. Çetek and F. Aybek, E. Çınar and A. Cavcar, pp 415-426.
Probabilistic considerations for growth and detection of cracks from rivet holes in a lap joint. M.L. Cohen and J.D. Achenbach, pp 727-740.
The virtual AirDyn: A simulation technique for evaluating the aerodynamic impact of ship superstructures on helicopter operations. C. H. Kääriä, J.S. Forrest and I. Owen, pp 1233-1248.

SIMULATION

In-flight simulation of wake encounters using deformed vortices. V. Vechtel, pp 997-1018.
New directions for air traffic control simulators: A discussion to guide the selection and renovation of simulators. C. Çetek, F. Aybek, E. Çınar and A. Cavcar, pp 415-426.
Numerical simulation of ramp induced shock wave/boundary-layer interaction in turbulent fl ow. H.A. Asmelash, R.R. Martis and A. Singh, pp 629-638.
Recent achievements in numerical simulation for aircraft power-plant configurations. J. Reneaux, V. Brunet, S. Esquieu, M. Meunier and S. Mouton, pp 213-231.
Rotorcraft simulation fidelity: new methods for quantification and assessment. P. Perfect, A.W. Gubbels, pp 235-282.
Simulations of a low-boom, axisymmetric, external compression inlet. T.L. Coyne, B. Loth, J. Koncsek, D. Davis, T. Conners and D. Howe, pp 709-726.
The virtual AirDyn: A simulation technique for evaluating the aerodynamic impact of ship superstructures on helicopter operations. C. H. Kääriä, J.S. Forrest and I. Owen, pp 1233-1248.
Validation of mathematical models for helicopter flight simulators past, present and future challenges. M.D. Pavel, M. White, G.D. Padfield, G. Roth, M. Hamers and A. Taghizad, pp 343-388.

SPACE TECHNOILOGY

Constrained large angle reorientation manoeuvres of a space telescope using potential functions and a variable control gain. G. Mengali and A.A. Quarta, pp 807-821.
A virtual test environment for validating spacecraft optical navigation. S.M. Parkes, I. Martin, M.N. Dunstan, N. I. Rowel, O. Dubois-Matra and T. Voirin, pp 1075-1101.
Buoyancy estimation of a Montgolfière in the atmosphere of Titan. G.E. Dorrington, pp 943-957.
Creating a space debris catalogue for an orbital band with suitable candidates for active removal. D. Dean, pp 617-628.
One-dimensional model of a pulsed plasma thruster. T.R. Nada, pp 929-942.

STRUCTURES

Aerodynamic design and experimental modelling of an innovative supersonic three-dimensional air-intake. Y.P. Gounko, I.I. Mazhul and A.M. Kharitonov, pp 559-584.
Aerothermodynamics of a hypersonic projectile with a double-disk aerospike. R. Yadav and U. Guven, pp 913-928.
Design and optimisation of the external load bearing carry through structure of a columned multi bubble fuselage. S.H. Cho, C. Bil and R. Adams, pp 97-108.
Energy absorption of sandwiched honeycombs with facesheets under in-plane crushing. B. Atli-Veltin and B. Gandhi, pp 687-708.
Influence of weight modelling on the outcome of wing design using multidisciplinary design optimisation techniques. J. Mariens, A. Elham and M.J.L. van Tooren, pp 871-895.
On the effectiveness of active aeroelastic structures for morphing aircraft. R.M. Ajaj, M.I. Friswell and E.I. Saavedra Flores, pp 1167-1176.
Probabilistic considerations for growth and detection of cracks from rivet holes in a lap joint. M.L. Cohen and J.D. Achenbach, pp 727-740.
The influence of simulated missile warhead fragment damage on the aerodynamic characteristics of two-dimensional wings. A.J. Irwin and P.M. Render, pp 823-837.
The influence of transition onset location on the performance of shock control bumps. S.C. McIntosh and N. Qin, pp 1037-1051.
The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures. S. Niemann, B. Kolesnikov, H. Lohse-Busch, C. Hühne, O.M. Querin, V.V. Toropov and D. Liu, pp 1139-1154.
The virtual AirDyn: A simulation technique for evaluating the aerodynamic impact of ship superstructures on helicopter operations. C.H. Kääriä, J.S. Forrest and I. Owen, pp 1233-1248.

SUPERSONIC FLIGHT

Aerodynamic design and experimental modelling of an innovative supersonic three-dimensional air-intake. Y.P. Gounko, I.I. Mazhul and A.M. Kharitonov, pp 559-584.
Optimisation of round bodies for aerodynamic performance and stability at supersonic speeds. W. Jiajan, R.S.M Chue, T. Nguyen and S. Yu, pp 661-685.
Supersonic flow over three dimensional cavities. R. Das and J. Kurian, pp 175-192.

SYSTEMS

A new method to reduce the noise of the miniaturised inertial sensors disposed in redundant linear

configurations. T.L. Grigorie and R.M. Botez, pp 111-132.
A virtual test environment for validating spacecraft optical navigation. S.M. Parkes, I. Martin, M.N. Dunstan, N. I. Rowel, O. Dubois-Matra and T. Voirin, pp 1075-1101.
Aerodynamic design and experimental modelling of an innovative supersonic three-dimensional air-intake. Y.P. Gounko, I.I. Mazhul and A.M. Kharitonov, pp 559-584.
Design, test and evaluation of an actively stabilised drogue refuelling system. T. Kuk and K. Ro, pp 1103-1118.
Effect of autopilot modes on flight performances of electric mini-UAVs. G. Guglieri, pp 57-69.
Enabling technologies for a centre-line tiltrotor. B. Burrage and E. Çınar, pp 389-414.
Energy absorption of sandwiched honeycombs with facesheets under in-plane crushing. B. Atli-Veltin and B. Gandhi, pp 687-708.
Guided bomb release planning based on Monte Carlo in a distributed virtual environment. Z. Wang and J. Wang, pp 585-603.
Guided wave propagation in composite laminates using piezoelectric wafer active sensors. M. Gresil and V. Giurgiutiu, pp 971-995.
Optimal aircraft take-off with thrust vectoring. A.K. Vinayagam and N.K. Sinha, pp 1119-1138.
Robust and computational efficient autopilot design: A hybrid approach based on classic control and genetic-fuzzy sliding mode control. A.R. Babaei, M. Mortazavi and M.B. Menhaj, pp 839-859.
Roll control of a MALE UAV using the adaptive torsion wing. R.M. Ajaj, M.I. Friswell, W.G. Dettmer, A.T. Isikveren and G. Allegri, pp 299-314.
Validation of endurance estimates for battery powered UAVs. L.W. Traub, pp 1155-1166.
Validation of mathematical models for helicopter flight simulators past, present and future challenges. M.D. Pavel, M. White, G.D. Padfield, G. Roth, M. Hamers and A. Taghizad, pp 343-388.

TESTING

Aerodynamic design and experimental modelling of an innovative supersonic three-dimensional air-intake. Y.P. Gounko, I.I. Mazhul and A.M. Kharitonov, pp 559-584.
Application of the weight function method on a high incidence research aircraft model. N. Anton, R.M Botez and D. Popescu, pp 897-912.
Comparison of flight test data with a computational fluid dynamics model of a Scottish Aviation Bulldog aircraft. N.J. Lawson, pp 1273-1291.
Design, test and evaluation of an actively stabilised drogue refuelling system. T. Kuk and K. Ro, pp 1103-1118.
Effect of autopilot modes on flight performances of electric mini-UAVs. G. Guglieri, pp 57-69.
Effect of change in role of an aircraft on engine life. A. Gad-Briggs, A. Haslam and P. Laskaridis, pp 1053-1070.
Energy absorption of sandwiched honeycombs with facesheets under in-plane crushing. B. Atli-Veltin and B. Gandhi, pp 687-708.
Experimental studies on rectangular jets with trapezoidal tabs. A. Arokkiaswamy, S.B. Verma and S. Venkateswaran, pp 505-517.
Guided bomb release planning based on Monte Carlo in a distributed virtual environment. Z. Wang and J. Wang, pp 585-603.
Influence of weight modelling on the outcome of wing design using multidisciplinary design optimisation techniques. J. Mariens, A. Elham and M.J.L. van Tooren, pp 871-895.
Optimal aircraft take-off with thrust vectoring. A.K. Vinayagam and N.K. Sinha, pp 1119-1138.
Pressure measurements over a hemisphere-cylinder body attached with a forward facing spike. R. Kalimuthu, R.C. Mehta and E. Rathakrishnan, pp 639-646.
Validation of mathematical models for helicopter flight simulators past, present and future challenges. M.D. Pavel, M. White, G.D. Padfield, G. Roth, M. Hamers and A. Taghizad, pp 343-388.

UAVS

Aerodynamic performance benefits of utilising camber morphing wings for unmanned air vehicles. A. García Naranjo, I. Cowling, J.A. Green and N. Qin, pp 315-327.
Aerodynamic studies over a manoeuvring UCAV 1303 configuration. M.S. Chandrasekhara and B.K. McLain, pp 445-465.
Buoyancy estimation of a Montgolfière in the atmosphere of Titan. G.E. Dorrington, pp 943-957.
Effect of autopilot modes on flight performances of electric mini-UAVs. G. Guglieri, pp 57-69.
Formation of vortices and spanwise flow on an insect-like flapping wing throughout a flapping half cycle. N. Phillips and K. Knowles, pp 471-490.
Roll control of a MALE UAV using the adaptive torsion wing. R.M. Ajaj, M.I. Friswell, W.G. Dettmer, A.T. Isikveren and G. Allegri, pp 299-314.
Validation of endurance estimates for battery powered UAVs. L.W. Traub, pp 1155-1166.
Vision guidance of a fixed wing UAV using a single camera configuration. P.-T. Iong, S.-H. Chen and Y. Yang, pp 147-173.

UNSTEADY AERODYNAMICS

Formation of vortices and spanwise flow on an insect-like flapping wing throughout a flapping half cycle. N. Phillips and K. Knowles, pp 471-490.
The influence of simulated missile warhead fragment damage on the aerodynamic characteristics of two-dimensional wings. A.J. Irwin and P.M. Render, pp 823-837.

Author Index

ACHENBACH, J.D. and COHEN, M.L.
Probabilistic considerations for growth and detection of cracks from rivet holes in a lap joint, pp 727-740.

ADAMS, R., CHO, S.H. and BIL, C.
Design and optimisation of the external load bearing carry through structure of a columned multi bubble fuselage, pp 97-108.

AJAJ, R.M., FRISWELL, M.I., DETTMER, W.G., ISIKVEREN, A.T. and ALLEGRI, G.
Roll control of a MALE UAV using the adaptive torsion wing, pp 299-314.

AJAJ, R.M., FRISWELL, M.I., SMITH, D. and ISIKVEREN, A.T.
A conceptual wing-box weight estimation model for transport aircraft, pp 533-551.

AJAJ, R.M., FRISWELL, M.I. and SAAVEDRA FLORES, E.I.
On the effectiveness of active aeroelastic structures for morphing aircraft, pp 1167-1176.

Fuel burn prediction algorithm for cruise, constant speed and level flight segments, pp 491-504.

LABOUR, D., FÉLIX PATRÓN., R.S. and BOTEZ, R.M.
New altitude optimisation algorithm for the flight management system CMA-9000 improvement on the A310 and L-1011 aircraft, pp 787-805.

LASKARIDIS, P., GAD-BRIGGS, A. and HASLAM, A.
Effect of change in role of an aircraft on engine life, pp 1053-1070.

LAWSON, C.P., SMITH, H.A. and LINARES, C.
Multidisciplinary optimisation framework for minimum rotorcraft fuel and air pollutants at mission level, pp 749-767.

LAWSON, N.J.
Comparison of flight test data with a computational fluid dynamics model of a Scottish Aviation bulldog aircraft, pp 1273-1291.

LINARES, C., LAWSON, C.P. and SMITH, H.A.
Multidisciplinary optimisation framework for minimum rotorcraft fuel and air pollutants at mission level, pp 749-767.

LIU, D., NIEMANN, S., KOLESNIKOV, B., LOHSE-BUSCH, H., HÜHNE, C., QUERIN, O.M. and TOROPOV, V.V.
The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures, pp 1139-1154.

LIU, Y.
Assessment of surface roughness for a 'silent' aircraft, pp 283-298.

LOHSE-BUSCH, H., HÜHNE, C., QUERIN, O.M., TOROPOV, V.V., LIU, D., NIEMANN, S. and KOLESNIKOV, B.
The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures, pp 1139-1154.

LOTH, B., KONCSEK, J., DAVIS, D., CONNERS, T., HOWE, D. and COYNE, T.L.
Simulations of a low-boom, axisymmetric, external compression inlet, pp 709-726.

LUTZ, T., VAUX, S., BOLDS-MOOREHEAD, P. J. and CHANEY, V. G.
Stalling transport aircraft, pp 1183-1206.

MARIENS, J., ELHAM, A. and VAN TOOREN, M.J.L.
Influence of weight modelling on the outcome of wing design using multidisciplinary design optimisation techniques, pp 871-895.

MARTIN, I., DUNSTAN, M.N., ROWEL, N. L., DUBOIS-MATRA, O., VOIRIN, T. and PARKES, S.M. A virtual test environment for validating spacecraft optical navigation, pp 1075-1101.

MARTIS, R.R., SINGH, A. and ASMELASH, H.A.
Numerical simulation of ramp induced shock wave/boundary-layer interaction in turbulent fl ow, pp 629-638.

MAZHUL, I.I., KHARITONOV, A.M. and GOUNKO, Y.P.
Aerodynamic design and experimental modelling of an innovative supersonic three-dimensional air-intake, pp 559-584.

MCINTOSH, S.C. and QIN, N.
The influence of transition onset location on the performance of shock control bumps, pp 1037-1051.

MCLAIN, B.K. and CHANDRASEKHARA, M.S.
Aerodynamic studies over a manoeuvring UCAV 1303 configuration, pp 445-465.

MEHTA, R.C., RATHAKRISHNAN, E. and KALIMUTHU, R.
Pressure measurements over a hemisphere-cylinder body attached with a forward facing spike, pp 639-646.

MENGALI, G. and QUARTA, A.A.
Constrained large angle reorientation manoeuvres of a space telescope using potential functions and a variable control gain, pp 807-821.

MENHAJ, M.B., BABAEI, A.R. and MORTAZAVI, M.
Robust and computational efficient autopilot design: A hybrid approach based on classic control and genetic-fuzzy sliding mode control, pp 839-859.

MEUNIER, M., MOUTON, S., RENEAUX, J., BRUNET, V. and ESQUIEU, S.
Recent achievements in numerical simulation for aircraft power-plant configurations, pp 213-231.

MONTERZINO, G., FIELDING, J. and JEMITOLA, P.O.
Wing mass estimation algorithm for medium range box wing aircraft, pp 329-340.

MORTAZAVI, M., MENHAJ, M.B. and BABAEI, A.R.
Robust and computational efficient autopilot design: A hybrid approach based on classic control and genetic-fuzzy sliding mode control, pp 839-859.

MOUTON, S., RENEAUX, J., BRUNET, V., ESQUIEU, S. and MEUNIER, M.
Recent achievements in numerical simulation for aircraft power-plant configurations, pp 213-231.

NADA, T.R.
One-dimensional model of a pulsed plasma thruster, pp 929-942.

NEELY, A.J., DEEPAK, N.R. and GAI, S.L.
A computational investigation of laminar shock/wave boundary layer interactions, pp 27-56.

NGUYEN, T., YU, S., JIAJAN, W. and CHUE, R.S.M
Optimisation of round bodies for aerodynamic performance and stability at supersonic speeds, pp 661-685.

NIEMANN, S., KOLESNIKOV, B., LOHSE-BUSCH, H., HÜHNE, C., QUERIN, O.M., TOROPOV, V.V. and LIU, D.
The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures, pp 1139-1154.

OWEN, I., KÄÄRIÄ, C. H. and FORREST, J.S.
The virtual AirDyn: A simulation technique for evaluating the aerodynamic impact of ship superstructures on helicopter operations, pp 1233-1248.

PADFIELD, G.D., ROTH, G., HAMERS, M., TAGHIZAD, A., PAVEL, M.D. and WHITE, M.
Validation of mathematical models for helicopter flight simulators past, present and future challenges, pp 343-388.

PAGE, G.J.
Rapid, parallel CFD grid generation using octrees, pp 133-146.

PARKES, S.M., MARTIN, I., DUNSTAN, M.N., ROWEL, N.L., DUBOIS-MATRA, O. and VOIRIN, T.
A virtual test environment for validating spacecraft optical navigation, pp 1075-1101.

PAVEL, M.D., WHITE, M., PADFIELD, G.D., ROTH, G., HAMERS, M. and TAGHIZAD, A.
Validation of mathematical models for helicopter flight simulators past, present and future challenges, pp 343-388.

PERFECT, P. and GUBBELS, A.W.
Rotorcraft simulation fidelity: new methods for quantification and assessment, pp 235-282.

PHILLIPS, N. and KNOWLES, K.
Formation of vortices and spanwise flow on an insect-like flapping wing throughout a flapping half cycle, pp 471-490.

PIKE, J.
Hypersonic minimum drag forebodies with blunt leading edges, pp 553-557.

POPESCU, D., ANTON, N. and BOTEZ, R.M
Application of the weight function method on a high incidence research aircraft model, pp 897-912.

QIN, N., GARCÍA NARANJO, A., COWLING, I. and GREEN, J.A.
Aerodynamic performance benefits of utilising camber morphing wings for unmanned air vehicles, pp 315-327.

QIN, N. and MCINTOSH, S.C.
The influence of transition onset location on the performance of shock control bumps, pp 1037-1051.

QUAN, Z., KHANDELWAL, B., KARAKURT, A., SETHI, V. and SINGH, R.
Preliminary design and performance analysis of a low emission aero-derived gas turbine combustor, pp 1249-1273.

QUARTA, A.A. and MENGALI, G.
Constrained large angle reorientation manoeuvres of a space telescope using potential functions and a variable control gain, pp 807-821.

QUERIN, O.M., TOROPOV, V.V., LIU, D., NIEMANN, S., KOLESNIKOV, B., LOHSE-BUSCH, H. and HÜHNE, C.
The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures, pp 1139-1154.

RATHAKRISHNAN, E., KALIMUTHU, R. and MEHTA, R.C.
Pressure measurements over a hemisphere-cylinder body attached with a forward facing spike, pp 639-646.

RENDER, P.M. and IRWIN, A.J.
The influence of simulated missile warhead fragment damage on the aerodynamic characteristics of two-dimensional wings, pp 823-837.

RENEAUX, J., BRUNET, V., ESQUIEU, S., MEUNIER, M. and MOUTON, S.
Recent achievements in numerical simulation for aircraft power-plant configurations, pp 213-231.

RIGHI, M.
A finite-volume gas-kinetic method for the solution of the Navier-Stokes equations, pp 605-616.

RO, K. and KUK, T.
Design, test and evaluation of an actively stabilised drogue refuelling system, pp 1103-1118.

ROTH, G., HAMERS, M., TAGHIZAD, A., PAVEL, M.D., WHITE, M. and PADFIELD, G.D.
Validation of mathematical models for helicopter flight simulators past, present and future challenges, pp 343-388.

ROWEL, N.L., DUBOIS-MATRA, O., VOIRIN, T., PARKES, S.M., MARTIN, I. and DUNSTAN, M.N.
A virtual test environment for validating spacecraft optical navigation, pp 1075-1101.

RUSHCHITSKY, J.J., GUZ, A.N and GUZ, I.A.
Effect of a special reinforcement on the elastic properties of micro- and nanocomposites with polymer matrix, pp 1019-1036.

SAAVEDRA FLORES, E.I., AJAJ, R.M. and FRISWELL, M.I.
On the effectiveness of active aeroelastic structures for morphing aircraft, pp 1167-1176.

SETHI, V., SINGH, R., QUAN, Z., KHANDELWAL, B. and KARAKURT, A.
Preliminary design and performance analysis of a low emission aero-derived gas turbine combustor, pp 1249-1275.

SINGH, A., ASMELASH, H.A. and MARTIS, R.R.
Numerical simulation of ramp induced shock wave/boundary-layer interaction in turbulent fl ow, pp 629-638.

SINGH, R., QUAN, Z., KHANDELWAL, B., KARAKURT, A. and SETHI, V.
Preliminary design and performance analysis of a low emission aero-derived gas turbine combustor, pp 1249-1274.

SINHA, N.K. and VINAYAGAM, A.K.
Optimal aircraft take-off with thrust vectoring, pp 1119-1138.

SMITH, D., ISIKVEREN, A.T., AJAJ, R.M. and FRISWELL, M.I.
A conceptual wing-box weight estimation model for transport aircraft, pp 533-551.

SMITH, H.A., LINARES, C. and LAWSON, C.P.
Multidisciplinary optimisation framework for minimum rotorcraft fuel and air pollutants at mission level, pp 749-767.

TAGHIZAD, A., PAVEL, M.D., WHITE, M., PADFIELD, G.D., ROTH, G. and HAMERS, M.
Validation of mathematical models for helicopter flight simulators past, present and future challenges, pp 343-388.

TIPNIS, T.J., FINNIS, M.V, KNOWLES, K. and BRAY, D.
Density measurements for rectangular free jets using background-oriented schlieren, pp 771-785.

TOET, W.
Aerodynamics and aerodynamic research in Formula 1, pp 1-26.

TOROPOV, V.V., LIU, D., NIEMANN, S., KOLESNIKOV, B. and LOHSE-BUSCH, H., HÜHNE, C. and QUERIN, O.M.
The use of topology optimisation in the conceptual design of next generation lattice composite aircraft fuselage structures, pp 1139-1154.

TRAUB, L.W.
Validation of endurance estimates for battery powered UAVs, pp 1155-1166.

VAN TOOREN, M.J.L., MARIENS, J. and ELHAM, A.
Influence of weight modelling on the outcome of wing design using multidisciplinary design optimisation techniques, pp 871-895.

VAUX, S., BOLDS-MOOREHEAD, P.J., CHANEY, V.G. and LUTZ, T.
Stalling transport aircraft, pp 1183-1206.

VECHTEL, V.
In-flight simulation of wake encounters using deformed vortices, pp 997-1018.

VENKATESWARAN, S., AROKKIASWAMY, A. and VERMA, S.B.
Experimental studies on rectangular jets with trapezoidal tabs, pp 505-517.

VERMA, S.B., VENKATESWARAN, S. and AROKKIASWAMY, A.
Experimental studies on rectangular jets with trapezoidal tabs, pp 505-517.

VINAYAGAM, A.K. and SINHA, N.K.
Optimal aircraft take-off with thrust vectoring, pp 1119-1138.

VOIRIN, T., PARKES, S.M., MARTIN, I., DUNSTAN, M.N., ROWEL, N.L. and DUBOIS-MATRA, O.
A virtual test environment for validating spacecraft optical navigation, pp 1075-1101.

WAAS, A.M. and JI, W.
Progressive failure analysis for the interaction of interlaminar and intralaminar failure modes in composite structures with an initial delamination, pp 71-85.

WANG, X., DUAN, D. and ZHANG, M.
Panel method predictions of added mass for flexible airship, pp 519-531.

WANG, Z. and WANG, J.
Guided bomb release planning based on Monte Carlo in a distributed virtual environment, pp 585-603.

WANG, J. and WANG, Z.
Guided bomb release planning based on Monte Carlo in a distributed virtual environment, pp 585-603.

WHITE, M., PADFIELD, G.D., ROTH, G., HAMERS, M., TAGHIZAD, A. and PAVEL, M.D.
Validation of mathematical models for helicopter flight simulators past, present and future challenges, pp 343-388.

YADAV, R. and GUVEN, U.
Aerothermodynamics of a hypersonic projectile with a double-disk aerospike, pp 913-928.

YANG, Y., IONG, P.-T. and CHEN, S.-H.
Vision guidance of a fixed wing UAV using a single camera configuration, pp 147-173.

YU, S., JIAJAN, W., CHUE, R.S.M and NGUYEN, T.
Optimisation of round bodies for aerodynamic performance and stability at supersonic speeds, pp 661-685.

ZHANG, M., WANG, X. and DUAN, D.
Panel method predictions of added mass for flexible airship, pp 519-531.
